HOW TO USE THIS GUIDE

This guide is the single source of truth for how the Mark Harbert brand looks. Use it any time you build a page, a funnel, a slide, an email, or a PDF. If something here conflicts with an older file, this guide wins.

Who it's for

You, any VA or designer you hire, and any AI tool you hand work to. Give them this PDF and the Voice and Style Primer V3, and they have everything they need to make work that looks and sounds like you.

What's inside

Section	What it covers
Brand at a glance	The one-page cheat sheet
Voice	Where your voice rules live
Logo	Your logo, versions, clear space, sizing, misuse
Color	The palette, codes, ratios, and why it works
Contrast	Which color pairs are safe for text
Typography	Inter Tight and Inter, the type scale, and rules
Space and layout	White space, spacing scale, page structure
Buttons, links, and cards	Interface pieces for pages and funnels
Graphic elements	The frame, the accent underline, and icons
Photography	Headshots, lifestyle shots, and photo rules
Platform rules	Social, slides, email, PDFs, blog, and where thumbnail rules live
Developer tokens	Copy-and-paste CSS for the web
Retired items	Old colors and fonts to phase out
Publish checklist	A final check before anything goes live
Version history	What changed in each version, and what's next

CHEAT SHEET

BRAND AT A GLANCE

If you only read one page, read this one.

Item	The rule
Primary colors	Midnight Navy #06092A and Harbert Red #D5180C
Supporting colors	Deep Teal #004566, Sky Blue #3E92CC, and Link Blue #2073AC
Neutrals	White #FFFFFF, Cool White #F5F7FA, Cool Gray #DCE3EC, Ink #1A1F3C, Slate #5E6680
Color balance	About 65% white and cool white, 20% navy, 10% blues and grays, 5% red
Red is for	Action only. Buttons and clickable calls to action, plus HARBERT in your logo
Headline font	Inter Tight, Bold to Black, all caps
Body font	Inter Regular, 17 to 18px on the web, line height 1.6
Logo font	Montserrat ExtraBold, for the logo only, never retyped
Logo	MARK in white, HARBERT in red, inside a white frame on a dark field
White space	Lots of it. 96px between web sections, one idea per block
Text width	Body text never wider than 680px
Buttons	Harbert Red, white Inter Bold text, 8px corners
Links	Link Blue #2073AC and underlined on light. Sky Blue #3E92CC and underlined on navy
Corners	8px on buttons and inputs, 12px on cards and images
Voice	Follow the Voice and Style Primer V3
Thumbnails	Follow the separate Thumbnail Playbook, not this guide
Never	Red on anything that isn't clickable, black backgrounds, extra fonts, crowded layouts

HOW YOU SOUND

VOICE

Your voice already has its own home: the Mark Harbert Voice and Style Primer V3. This guide does not repeat it. Everything about how you sound lives there.

The rule
Anything written in your name follows the Voice and Style Primer V3 (57 pages, August 2026). Hand it to anyone writing for you, and load it into any AI tool before it writes a word. When the primer and this guide seem to overlap, the primer decides how it sounds and this guide decides how it looks.

How you're introduced

These are the facts that stay consistent everywhere your name appears. They describe who you are. They are not copy, so word them in your voice each time.

Item	Use
Name	Mark Harbert
Title	Video Marketing Expert
Website	markharbert.com
Who you serve	Network marketers, affiliate marketers, coaches, course creators, and online entrepreneurs
What you teach	Video marketing, AI-driven content, email marketing, and funnels that sell
Started online	2008
Full-time online	Since 2012
Stages	20-plus stages
Company	Uplevel Marketing LLC
Home base	Tipp City, Ohio

Always write it as full-time since 2012, never full-time since 2008. Online since 2008 and full-time since 2012 are two different facts.

YOUR MARK

LOGO

Your logo is a wordmark: MARK in white and HARBERT in red, set in Montserrat ExtraBold, inside a white frame on a dark field. The white frame is part of the logo. It is never removed.

Primary logo. Original file: Mark-Harbert-Logo-800.png (800 x 200 px), as used on markharbert.com.

What the logo is made of

Part	Spec
MARK	White #FFFFFF, Montserrat ExtraBold, all caps
HARBERT	Harbert Red #D5180C, Montserrat ExtraBold, all caps
Frame	White #FFFFFF outline around the full wordmark
Field	Black #000000 in the original file. On navy pages, use the knockout version on the next page
Shape	4 to 1 wide rectangle (800 x 200 px)

LOGO

Versions and backgrounds

Use the version that matches the background. The goal is always the same: white MARK, red HARBERT, white frame, with plenty of dark space inside the frame.

Knockout on Midnight Navy. Default for navy hero bands, slides, and dark graphics. The black field is removed so the navy shows through.

Original on white or light. The logo keeps its own dark field, so it reads like a badge on white and Cool White pages.

Icon mark (the M)

Your site icon is a single red M. Use it for the favicon, app icons, and social avatars where the full wordmark is too small to read. Update its red from the current #BB0000 to Harbert Red #D5180C so it matches the logo.

Clear space and size

Rule	Spec
Clear space	Keep empty space around the logo equal to the height of the H in HARBERT on every side. No text, photos, or edges inside that zone.
Minimum size, web	160 px wide. Smaller than that, use the red M icon instead
Minimum size, print	1.25 inches wide
Website header	180 to 220 px wide
Slides and PDFs	Cover: 50 to 70% of the page width. Inside pages: small, in a corner or the footer
Thumbnails	See the Thumbnail Playbook

LOGO

Logo don'ts

Your logo only works if it looks the same everywhere. Never do any of these.

Don't	Why
Retype the logo in another font	Montserrat ExtraBold is part of the mark. Always use the image file
Recolor MARK or HARBERT	White and Harbert Red only. No blue, no gradients, no all-white version on photos
Remove or thicken the frame	The frame is part of the logo and the source of your frame graphic
Stretch, squash, or tilt it	Always scale from a corner so it stays 4 to 1
Add shadows, glows, or outlines	Flat colors only
Put the original black box on navy	Black next to navy looks like a mistake. Use the knockout version
Place it on a busy photo	Put a solid navy band behind it or move it
Shrink it below 160 px	Switch to the red M icon instead

Files to keep together

Mark-Harbert-Logo-800.png (original, on dark field), the knockout PNG with a transparent background for navy, the red M icon at 300 x 300 px, and a high-resolution or vector version for print. If you don't have a vector file, ask your designer to rebuild one from Montserrat ExtraBold so print stays sharp.

PALETTE

COLOR

Your palette is a tight family of cool blues with one strong red across the color wheel. These codes come from your live site and your logo file, cleaned up into one system.

Primary and supporting

#06092A

Midnight Navy
Primary. Bands, nav, slides
RGB 6, 9, 42
CMYK 86, 79, 0, 84

#D5180C

Harbert Red
Action only: buttons, CTAs
RGB 213, 24, 12
CMYK 0, 89, 94, 16

#004566

Deep Teal
Dividers, borders, eyebrows
RGB 0, 69, 102
CMYK 100, 32, 0, 60

#3E92CC

Sky Blue
Links and accents on navy
RGB 62, 146, 204
CMYK 70, 28, 0, 20

Neutrals

#FFFFFF

White
Main page background
RGB 255, 255, 255
CMYK 0, 0, 0, 0

#F5F7FA

Cool White
Alternate sections
RGB 245, 247, 250
CMYK 2, 1, 0, 2

#DCE3EC

Cool Gray
Borders, dividers
RGB 220, 227, 236
CMYK 7, 4, 0, 7

#1A1F3C

Ink
Body text on light
RGB 26, 31, 60
CMYK 57, 48, 0, 76

#2073AC

Link Blue
Text links on light pages
RGB 32, 115, 172
CMYK 81, 33, 0, 33

#5E6680

Slate
Captions, small print
RGB 94, 102, 128
CMYK 27, 20, 0, 50

#B5140A

Red Hover
Button hover state only
RGB 181, 20, 10
CMYK 0, 89, 94, 29

CMYK values are close conversions for print. Ask your printer for a proof before a large run.

COLOR

Balance and roles

You like lots of white space, so the page is mostly light. Navy comes in as bold bands. Red stays rare, which is what keeps it powerful. Aim for this balance on any page, slide set, or graphic set:

White and Cool White | Midnight Navy | Blues and grays

The thin red slice on the right is about 5%: your buttons and calls to action, nothing else.

Color	Use it for	Never use it for
Midnight Navy	Nav bar, hero band, proof band, closing call to action, slide backgrounds, headlines on white	Body text blocks on white (use Ink), full pages of solid navy on the web
Harbert Red	Buttons and clickable calls to action. HARBERT in the logo	Links, eyebrows, headline words, underlines, icons, or any decoration on pages, funnels, emails, or PDFs
Deep Teal	Dividers, thin card borders, eyebrow labels on white, secondary icons	Links (use Link Blue) and buttons
Sky Blue	Links on navy, icons, accent underlines, highlight bars	White text on top of it, small text on white
Link Blue	Text links on white and Cool White, always underlined	Buttons, headlines, decoration (blue text should always mean link)
Cool White	Alternating page sections, card backgrounds, callout boxes	Text
Cool Gray	Borders, dividers, table lines, input outlines	Text
Ink	All body text on white and Cool White	Backgrounds
Slate	Captions, fine print, form hints, dates	Headlines

Red means action

Harbert Red #D5180C is your action color. On pages, funnels, emails, and PDFs it appears only on things people click: buttons and calls to action. Because red never shows up as decoration, visitors learn fast that red means click here. It is the same red as HARBERT in your logo, and white button text on it passes contrast at 5.3. Slides and social graphics aren't clickable, so they may use one red word or accent.

WHY IT WORKS

COLOR HARMONY

Your palette holds together on the color wheel for four reasons.

Principle	What it means for you
One blue family	Midnight Navy (235 degrees), Deep Teal (199), and Sky Blue (205) sit within about 35 degrees of each other. Colors that close always look related. Navy leans slightly violet, which gives depth.
Red sits across the wheel	Harbert Red (4 degrees) is roughly opposite your blues, a split complement. That opposition is why a red button jumps off a navy or white page, and why red works as your one action color.
Links stay in the family	Link Blue #2073AC is the same hue as Sky Blue (205 degrees), just deeper so it reads on white. It adds a clear link signal without adding a new color.
Neutrals share the temperature	Cool White and Cool Gray carry a hint of blue, so even the backgrounds belong to the blue family instead of fighting it.
Wide light-to-dark range	From near-black navy to near-white Cool White, with teal and sky blue as steps between. That spread gives clean contrast and easy reading.

The one way to break it

Using red for anything that isn't an action. Keep it to buttons, about 5% of any page. Once red shows up as decoration, buttons stop standing out and the blues start to feel noisy.

CONTRAST

Safe text pairs

Contrast decides whether people can actually read your page, especially on phones. The web standard (WCAG AA) is 4.5 to 1 for normal text and 3 to 1 for large text (24px and up, or 19px bold).

Sample	Pair	Ratio	Result
Aa	White on Midnight Navy	19.4 : 1	Pass, any size
Aa	Navy on Cool White	18.1 : 1	Pass, any size
Aa	Ink on White	16.1 : 1	Pass, any size
Aa	White on Deep Teal	10.3 : 1	Pass, any size
Aa	Deep Teal on Cool White	9.6 : 1	Pass, any size
Aa	Sky Blue on Midnight Navy	5.7 : 1	Pass, any size
Aa	Slate on White	5.7 : 1	Pass, any size
Aa	White on Harbert Red	5.3 : 1	Pass, buttons are safe
Aa	Link Blue on White	5.1 : 1	Pass, links
Aa	Link Blue on Cool White	4.8 : 1	Pass, links
Aa	Harbert Red on Navy	3.7 : 1	Large headlines only
Aa	White on Sky Blue	3.4 : 1	Avoid for text

TYPE

TYPOGRAPHY

Two fonts, both from the same family, both free on Google Fonts. Inter Tight is Inter with the letters set closer together, which makes headlines punchy and compact. Inter keeps body text easy to read on phones.

Inter Tight Black
Weight 900. Hero headlines and slide titles

SELL WITH VIDEO

Inter Tight ExtraBold
Weight 800. Section headlines

YOUR VIDEOS SHOULD SELL

Inter Tight Bold
Weight 700. Subheads, card titles

Three moves that turn views into buyers

Inter Bold
Weight 700. Buttons, eyebrows, labels

GET THE FREE TRAINING

Inter Regular
Weight 400. All body text

Most people post content and hope. A simple plan turns your videos into leads and sales.

Logo font, logo only
Montserrat ExtraBold is the font inside your logo. It lives in the logo image and nowhere else. Don't use it for headlines or body text, and never use it to retype the logo.

TYPOGRAPHY

Type scale

Use these sizes so every page has the same rhythm. Web sizes are for desktop. On phones, drop hero and section headlines by about 30% and keep body text at 17px.

Element	Font	Weight	Web	Slides	PDF / print	Line height
Hero headline	Inter Tight	Black 900	56 to 64px	54 to 72pt	30 to 40pt	1.05
Section headline	Inter Tight	ExtraBold 800	36 to 40px	36 to 44pt	22 to 28pt	1.1
Subheadline	Inter Tight	Bold 700	22 to 26px	24 to 28pt	15 to 18pt	1.25
Eyebrow label	Inter	Bold 700	13 to 14px	14 to 16pt	8 to 9pt	1.3
Body text	Inter	Regular 400	17 to 18px	20 to 24pt	10.5 to 11pt	1.6
Button text	Inter	Bold 700	16 to 18px	18 to 20pt	10 to 11pt	1
Caption / fine print	Inter	Regular 400	13 to 14px	14 to 16pt	8 to 9pt	1.45

Type rules

- **Headlines in all caps.** Inter Tight, Bold to Black, all caps. This matches your slides.
- **Body text in sentence case.** Never all caps for paragraphs.
- **Tight headlines, airy body.** Headline line height 1.05 to 1.1, body line height 1.6.
- **Eyebrows set the scene.** Small Inter Bold all caps label above a headline, with letter spacing of about 0.12em. Use Deep Teal on white and Cool Gray on navy.
- **Left-align body text.** Center only short headlines, single lines, and buttons.
- **No red text on pages.** Red belongs to buttons. For emphasis use bold or a Sky Blue underline. Slides may color one headline word red. Thumbnails follow the Thumbnail Playbook.
- **Blue text means link.** Never color plain text Link Blue or Sky Blue, or people will try to click it.
- **No italics for emphasis.** Use bold Inter instead.
- **Two fonts, ever.** Inter Tight and Inter. Nothing else on pages, slides, PDFs, or graphics.
- **Fallbacks.** If Inter Tight isn't available in a tool, use Inter ExtraBold. If neither is available, use Arial Bold and Arial.

BREATHING ROOM

SPACE AND LAYOUT

White space is part of your brand. It makes navy look bold, makes red buttons pop, and makes your message easy to take in. When in doubt, add space and remove something.

Page structure

Pages are light by default. Navy shows up in focused bands:

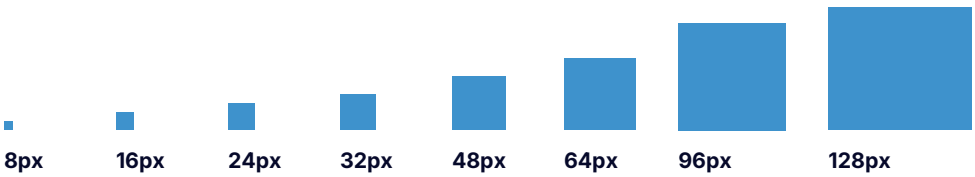

- **Navy:** navigation bar
- **Navy:** hero band with headline and one red button
- **White:** the main story and teaching
- **Cool White:** cards, proof, testimonials
- **Navy:** the closing call to action

Never stack two navy bands back to back. A light section always sits between them.

Spacing scale

Every gap on a page comes from this scale, built on 8px steps. No random numbers.

SPACE AND LAYOUT

Spacing rules

Space	Desktop	Phone
Between page sections	96 to 128px	64px
Section headline to content	32 to 48px	24px
Between paragraphs	16 to 24px	16px
Around a button (above and below)	32px minimum	24px
Inside cards	32px padding	24px
Between cards	24 to 32px	16px
Page side margins	48px minimum	20px
Content width, full layout	1140px max	Full width minus margins
Body text width	680px max (about 65 to 75 characters a line)	Full width minus margins

Layout habits

- **One idea per block.** Each section makes one point. If it needs two, it becomes two sections.
- **Short paragraphs.** One to three sentences on pages, one to two in emails.
- **Let the button breathe.** Nothing sits within 32px of a call-to-action button.
- **Fewer elements, bigger spaces.** If a section feels busy, remove an element before you shrink anything.
- **Images get room.** Photos and graphics never touch text. Give them 24px or more.
- **Same rule on slides.** One point per slide, short text, and margins of at least 8% of the slide width.
- **Corners.** 8px on buttons and inputs, 12px on cards, images, and callouts.

INTERFACE

BUTTONS, LINKS, AND CARDS

These pieces show up on every funnel and page. Built the same way every time, they make your pages feel like one brand even across WordPress and ClickFunnels.

GET INSTANT ACCESS

Primary button. Harbert Red #D5180C, white text.

GET INSTANT ACCESS

Hover state. Red Hover #B5140A.

WATCH THE TRAINING

Secondary button. White fill, navy outline and text.

SEE HOW IT WORKS

Secondary on navy. Navy fill, white outline and text.

Property	Primary button spec
Fill	Harbert Red #D5180C. Hover: Red Hover #B5140A
Text	White, Inter Bold, 16 to 18px, all caps, letter spacing 0.04em
Size	Padding 16px top and bottom, 32px left and right. Minimum height 52px (easy to tap on phones)
Corners	8px
Wording	Action plus result: GET THE FREE TRAINING, SAVE MY SEAT, SEND ME THE GUIDE
How many	One primary button per screen. A second action uses the secondary style
Effects	None. No gradients, glows, or drop shadows

INTERFACE

Links, cards, and forms

Piece	Spec
Text links on white	Link Blue #2073AC, underlined. Hover: Midnight Navy, still underlined
Text links on navy	Sky Blue #3E92CC, underlined. Hover: White
Navigation links	Inter Medium 15px, white on navy. Active page gets a 2px Sky Blue underline
Cards	White on Cool White sections (or Cool White on white). 1px Cool Gray border, 12px corners, 32px padding. Title in Inter Tight Bold, Navy
Cards on navy	Deep Teal or #0D1240 fill, no border, white text, Cool Gray eyebrow
Form fields	White fill, 1px Cool Gray border, 8px corners, 52px tall, Inter 16px Ink text. Focus: 2px Sky Blue border
Field labels	Inter Medium 14px, Navy, above the field. Never placeholder-only labels
Opt-in forms	Ask for first name and email only. One red button underneath
Text calls to action	When a call to action is a text link, not a button, it stays Link Blue and underlined. Red is for buttons
Dividers	1px Cool Gray line. On navy, 1px Deep Teal
Callout boxes	Cool White fill, 3px Navy or Sky Blue bar on the left, 0 corners on the bar side
Testimonials	Cool White card, quote in Inter 18px Ink, name in Inter Bold Navy, small round photo

SIGNATURE PIECES

GRAPHIC ELEMENTS

Two simple devices come straight from your logo and your site. Use them to make graphics feel like yours without adding clutter.

The frame
A white rectangle outline, borrowed from your logo, around a short headline or label. Use it on navy for badges, social graphics, and slide titles. Line weight about 3% of the box height. One per graphic. The red word shown here is for slides only.

The accent underline
A short, solid Sky Blue bar under a key headline. Keep it under half the headline width and about 4px thick. On slides it may be Harbert Red. On pages, it is always Sky Blue.

Icons

- **Style:** simple outline icons, one family only (Tabler, Lucide, or Phosphor Regular are all close matches).
- **Stroke:** 2px at 24px size. Rounded line ends.
- **Color:** Navy or Deep Teal on light backgrounds, Sky Blue or White on navy. Never red, unless the icon sits inside a red button.
- **Size:** 24px inline, 32 to 48px for feature blocks.
- **Don't:** mix filled and outline icons, use clip art, or use 3D or emoji-style icons.

Accent bars and highlights

- Sky Blue bars 3 to 5px thick can underline section labels on navy.
- Background shapes stay flat. No gradients, glows, lens flares, or textures.
- Numbers and stats can be set large in Inter Tight Black, Navy on white or White on navy, with the unit in Sky Blue.

YOUR FACE IS THE BRAND

PHOTOGRAPHY

People buy from you because they connect with you. Photos should feel real, warm, and confident, the same person they see on video.

Primary headshot. Navy shirt, warm smile, direct eye contact, cut out for any background. From markharbert.com.

Lifestyle photo. Real moments with family support your story. Use on About sections and story-driven pages.

Photo rules

- **Wardrobe:** navy and blue shirts match the palette. Avoid red shirts (they fight the red buttons) and busy patterns.
- **Expression:** real smile, eyes to camera for headshots. Mid-sentence and teaching shots for b-roll.
- **Light:** soft, natural, front-facing. No harsh shadows or heavy filters.
- **Backgrounds:** clean and simple. Cut-out headshots sit on navy or Cool White.
- **Framing:** chest-up for headshots, leave room above the head. Don't crop at the joints.
- **Color:** keep skin tones true. A slight cool grade fits the palette, but never tint you blue.
- **Stock photos:** only when no real photo exists. Real people, natural settings, no staged handshakes.
- **Refresh:** new headshots every 18 to 24 months so your photos match how you look on video.

EVERYWHERE YOU SHOW UP

PLATFORM RULES

The same colors, fonts, and space rules, adjusted for each channel.

YouTube thumbnails: see the Thumbnail Playbook

Thumbnails are built to earn clicks in a crowded feed, so they follow their own rules in the separate Mark Harbert Thumbnail Playbook. The color, red, and layout rules in this guide do not apply to thumbnails. Use the Playbook for every thumbnail and blog featured image.

Channel	Rules
Social graphics	1080 x 1080 px (square) or 1080 x 1350 px (portrait). Navy or white background, Inter Tight headline, one idea per graphic, markharbert.com small at the bottom. Carousels: same layout on every slide
Slides	16:9. Midnight Navy backgrounds (never black), all-caps Inter Tight headlines, body in Inter. One point per slide. Section dividers in navy with a red or Sky Blue accent. Logo knockout on the cover only
Email	White background, 600px wide. Logo or text header at top. Inter (or Arial fallback) 16 to 17px. One or two sentences per paragraph. One Harbert Red button, or a Link Blue underlined link. No red text. No image-heavy designs
Lead magnet PDFs	Navy cover with knockout logo, white inside pages, Inter Tight headlines, Inter body. Red only on the call-to-action button. Links in Link Blue, underlined. Page numbers in the footer
Blog posts	White page, 680px text column, Inter 18px body, Inter Tight headings, featured image 1200 x 675 px made with the Thumbnail Playbook
Funnel pages	Navy hero band with one red button, white body sections, Cool White proof section, navy closing call to action. Mobile first, test on a phone before launch
Profile images	Primary headshot on a navy circle background. Banner: navy with the knockout logo and one line in Inter Tight

FOR THE WEB

DEVELOPER TOKENS

Paste this into WordPress (Appearance, Customize, Additional CSS), a ClickFunnels page's custom CSS, or any page built with AI. Then use the variable names instead of typing hex codes.

Part 1: brand variables

```

CLEAN UP

RETIRED ITEMS

These colors and fonts are on markharbert.com or in older files today. Swap them out as you update pages and kits. New work never uses them.

Retire	Where it shows up now	Replace with
#DE3333 red	Accent lines on the homepage, Canva kit	Harbert Red #D5180C
#DA0010 red	Blog buttons, menu links, search button	Harbert Red #D5180C on buttons. White or Sky Blue for menu links
Red text, red underlines, red labels	Accent lines and menu text on the site	Link Blue for links, Navy or Sky Blue for accents
Deep Teal links	Earlier link color	Link Blue #2073AC
#BB0000 red	Red M site icon	Harbert Red #D5180C
#0C0C0C and pure black	Blog load-more button, older slides and graphics	Midnight Navy #06092A
#DADADA gray	Borders and dividers	Cool Gray #DCE3EC
Montserrat (outside the logo)	Homepage text	Inter Tight or Inter
Oswald	Homepage text	Inter Tight
PT Sans Narrow	Homepage text	Inter
Poppins	Older PDFs and page elements	Inter Tight or Inter
Black slide backgrounds	Older decks	Midnight Navy #06092A

Canva brand kit update

When you rebuild the kit, add these colors in this order: Midnight Navy #06092A, Harbert Red #D5180C, Deep Teal #004566, Sky Blue #3E92CC, White #FFFFFF, Cool White #F5F7FA, Cool Gray #DCE3EC, Ink #1A1F3C, Link Blue #2073AC. Set headings to Inter Tight (or Inter ExtraBold if Canva lacks it) and body to Inter. Upload the original logo, the knockout logo, and the red M icon.

BEFORE YOU HIT PUBLISH

PUBLISH CHECKLIST

Run through this list on every page, funnel, deck, PDF, and email.

COLOR	
☐	Colors come only from this guide
☐	Navy, never black, for dark areas
☐	Links are Link Blue and underlined
☐	Red appears only on buttons and calls to action
☐	Page is mostly white and Cool White

TYPE	
☐	Only Inter Tight and Inter
☐	Headlines all caps, body in sentence case
☐	Body text 17px or larger on the web
☐	No text block wider than 680px

SPACE	
☐	Generous space between sections
☐	One idea per block
☐	Nothing crowds the button
☐	Looks clean on a phone

LOGO AND PHOTOS	
☐	Right logo version for the background
☐	Clear space around the logo
☐	Real, recent photos of you
☐	No stretched or filtered images

WORDS	
☐	Written to the Voice and Style Primer V3
☐	Facts match: online since 2008, full-time since 2012
☐	One clear call to action
☐	Every link and button tested

KEEP IT CURRENT

VERSION HISTORY

This is Version 1.0. Every update gets a new version number, a date, and a line below saying what changed. The version also appears on the cover, in every footer, and in the file name.

Version	Date	What changed
1.0	October 11, 2026	First edition. Logo rules, color palette with Harbert Red as the action color and Link Blue for links, contrast checks, Inter Tight and Inter typography, space and layout rules, buttons, links, cards, graphic elements, photography, platform rules, developer CSS, retired items, and the publish checklist

Planned for future versions

- **Photography:** new photos from an upcoming shoot to replace and expand the current examples.
- **Thumbnail Playbook:** a separate guide built from your channel data and niche research. Once it exists, this guide will link to it by version.
- **Canva brand kit:** confirm the kit matches this guide after you rebuild it.

How to number updates

- **Small fixes** (a typo, a clearer example, a new photo): 1.0 to 1.1, then 1.2.
- **Real rule changes** (a new color, a new font, a new section): 1.x to 2.0.
- **Name the file to match:** Mark_Harbert_Brand_Guide_v1.1.pdf, and keep the old versions in an archive folder.
- **Update all three spots:** the cover, the footer, and the table on this page.
